

Sanitizing Solution

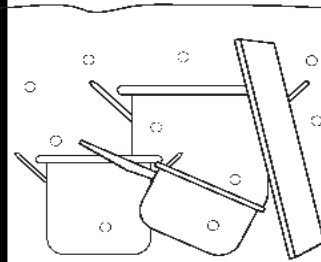

**Rinse,
Scrape, or
Soak**

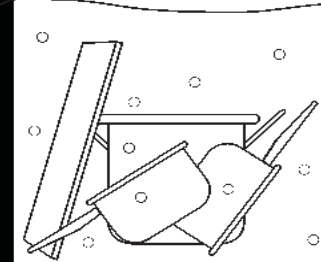

Wash

In hot detergent
solution

Rinse

Thoroughly in
clean 75°F water

Sanitize

Immerse in 75°F
chlorine solution for
30 seconds

Air Dry

- ✓ Mix a fresh sanitizing solution **each day** using the proportions of bleach to water listed below. The water temperature should be lukewarm (75° to 100°F); **very hot water will destroy the bleach.**
- ✓ **Remember:** Always check the solution strength with test strips. The solution should have a strength of **100 ppm.** Change the solution as needed throughout the day.

<u>Chlorine Bleach</u>		<u>Water</u>
1 Tablespoon (2 white plastic spoonfuls)	to	1 gallon
-----OR-----		
1/8 cup measure (2 Tablespoons)	to	2 gallons
